

A Co-Executor

The law does not limit the number of executors that may be appointed and there are often reasons for the appointment of an individual in addition to a trust company.

When a business is to be wound up and still more to be continued, the appointment of a surviving partner or business associate as executor along with the trust company is often a wise move.

One Company is essentially a business man's company. Our Board is composed of business men of experience and wisdom.

We suggest that you consider our appointment as executor of your will.

ARNSTEIN LAWYER
ASSAULT INFORMER
IN BIG BOND PLOT

Fallon Denounces Gluck as Thief Before a Washington Jury.

HUGE THEFTS SHOWN
Ring Paid Actual Robber
Only \$8,000 for \$1,000,000 in Securities.

COHEN'S PART REVEALED

'Big Nick' Said to Agreed on 40 Per Cent. Commission for Sales.

Special Dispatch to THE NEW YORK HERALD.

New York Herald Bureau, New York, D. C., Dec. 9.

William J. Fallon, counsel for Jules W. ("Nick") Arnstein, declared to be the master mind in the New York bond thefts, attempted to-day to discredit the testimony of Joseph Gluck, one-time Wall Street messenger who turned State's evidence to prosecute Arnstein and other men "higher up" in the circle of bond thieves. He branded Gluck as a thief, said he "always had been a thief and always would be." Gluck, despite the vigorous cross examination, retained his composure.

Fallon undertook to prove to the jury that Arnstein was not responsible for the robberies of Wall Street messengers and had no part in the transportation of the stolen securities to Washington, where they were made the basis of extensive loans.

The session was enlivened by occasional tilts between Fallon and James B. Archer, Assistant United States Attorney, on the construction that should be placed on the responses of Gluck to cross examination. Justice Gould intervened twice to inform the jury that the difference of opinion of counsel was not to be considered in arriving at a verdict.

"I want to show to this court," shouted Fallon, "that this witness, Gluck, always has been a thief, is one at this hour and always will be a thief."

Justice Gould, after a brief conference with the jury, returned to the bench.

YELLOW FEVER VACCINE
IS FOUND BY DR. NOGUCHI

Physician of Rockefeller Foundation Discovers Method for Immunization—Mexico and Central American Countries Get Good Results From Remedy.

Dr. George E. Vincent, president of the Rockefeller Foundation, announced yesterday that a vaccine for immunization against yellow fever had been discovered by Dr. Hideyo Noguchi, bacteriologist of the Rockefeller Institute for Medical Research.

The announcement, it appeared, had been delayed more than a year. Since the actual discovery was made supplies of the vaccine have been sent to Mexico and Central American countries, where inoculations have been made. The treatment also has received a thorough testing at the Broad Street Hospital in this city, where travelers going South have been inoculated.

These tests have resulted satisfactorily. The use of the vaccine has been so well received in Central American countries, Dr. Vincent declared, that quarantine restrictions have been removed for all travelers who have been inoculated with it.

Dr. Noguchi has been engaged in yellow fever control in Ecuador for many months, and it was while carrying out this work that he discovered the germ by which the disease was carried. The discovery was announced in 1918. Dr. Noguchi called the germ "tsetse" in honor of his wife.

After that news had been given to the world there ensued a period of silence. Dr. Noguchi was reported to be working on a serum. He discovered the germ in 1918. Dr. Vincent said:

"The latest shipment of vaccine to Mexico was accompanied in July last by a statement from Dr. Vincent that yellow fever had apparently been wiped out of Ecuador, where it had been a plague since 1912. At that time Dr. Vincent reported not a single case of yellow fever had been reported since June, 1919."

The latest shipment of vaccine to Mexico was accompanied in July last by a statement from Dr. Vincent that yellow fever had apparently been wiped out of Ecuador, where it had been a plague since 1912.
